Logansport State Hospital has served persons with mental illness since 1887. In 1993, an impressive, new, 409-bed facility was opened that is composed of five service lines: Admission Stabilization & Intermediate Care, Forensic Services, Intermediate Care for the Mentally Retarded, Geriatric Services, and Continuous Psychiatric Services. This beautiful, state-of-the-art facility will far surpass your typical stereotype of a State psychiatric hospital!!

Dr. Danny Meadows, Medical Director, and Dr. Gayle Iwamasa, Psychology Director, seek PhD or PsyD Psychologists to join collegial staff. Opportunities exist for both general and forensic clinical psychologists.

Forensic recruitment is due to the expansion of the forensic service line. The Isaac Ray Treatment Center expanded to 105 beds at the end of 2007 with the opening of the fifth unit. The Isaac Ray Treatment Center serves individuals who are incompetent to stand trial, individuals who have served their sentences with the Department of Correction (DOC) and continue to need mental health services, individuals found not guilty by reason of insanity and those mentally ill individuals with severely dangerous behaviors. The psychiatrists' success rate in restoring competency in 90 days to patients on this unit continues to increase!!! Exposure to a forensic/correctional population and experience with forensic evaluation/assessment tools required.

Our general psychology opening requires candidates to have experience with patients with severe mental illness. You will make a difference in the lives of a rich variety of the most chronically mentally-ill patients through active treatment, psychotherapy, managing patient activities, admissions, and psychological testing. If you are interested in an environment that has a consistently successful track record in treating the most severe dual-diagnosed patients, Logansport State Hospital is the place for you.

You will enjoy regular work hours and no required call. Competitive salary and comprehensive State benefits.
