Series 820 - Professional Psychology Courses

**18:820:504:01 #03593 **THEORETICAL FOUNDATIONS OF INTERVENTION
 COGNITIVE/BEHAVIORAL (2 crs) (first 10 weeks - Sch)
 Fishman (M1:15-4:00pm)****

An introduction to the theoretical foundations of the cognitive behavioral paradigm for understanding human events. Cognitive behavioral concepts will be learned and applied to formulate case examples from the community, clinic, schools, businesses, and the students' own lives.

**18:820:506:01 #11343 **SOCIAL DEVELOPMENTAL FOUNDATIONS OF HUMAN BEHAVIOR
 (3 crs) D. Shernoff (T9:15-12:00)****

This course is designed to provide students with an integrated overview of the social and developmental foundations of human behavior. It is difficult to understand any human behavior - either typical or atypical -- without employing a developmental perspective. Likewise, human behavior is largely influenced by social factors and processes. These influences on human behavior wane and wax over a period of time, with time defined variously (i.e., historically, chronologically, biologically, and/or other experience-related time scales). Furthermore, these influences are not uniform across subgroups and across different contexts. To pull together these various issues, a lifespan systems perspective will be utilized to examine contemporary, as well as classic, issues in social and developmental psychology.

**18:820:507:01 #14208 **LEARNING THEORY & COGNITIVE BEHAVIORAL FOUNDATIONS
 Rizvi (T9:15-12:00)****

The goal of this course will be to introduce students to cognitive-behavioral and learning theories, concepts, principles, and strategies, especially as they apply to psychotherapy. Students will become familiarized with several theories, techniques, and strategies that form the basis of most CBT approaches. In addition, they will learn to generate, from a learning theory perspective and a cognitive theory perspective, explanations of (case formulations of) (case conceptualizations of) (interpretations of) human events, through modeling, rehearsal, and shaping. Finally, case conceptualization skills from a CBT standpoint will be emphasized.
