Jeffrey D. Shahidullah, Ph.D.
Postdoctoral Fellow, Pediatric Psychology
Division of Psychiatry, Geisinger Medical Center

Jeffrey D. Shahidullah, PhD, NCSP earned his BA in psychology from Baylor University and his PhD in school psychology from Michigan State University. He is currently a pediatric psychology postdoctoral fellow at Geisinger Medical Center. Jeff completed his predoctoral internship in pediatric psychology at The Children’s Hospital of Philadelphia under the tutelage of Dr. Tom Power on the school/clinic/community track. Prior to working at CHOP, Jeff piloted an integrated behavioral health treatment algorithm for ADHD referrals in pediatric primary care at the University of Michigan Medical Center. The pilot was funded by Blue Cross Blue Shield and involved the school as an integral part of first line care. Jeff’s program of research pertains to enhancing access to and continuity of quality behavioral health care for youth where it is most accessible (primary care and schools). Three specific lines of research include 1) screening, assessment, and treatment of developmental and behavioral health problems in primary care, including training pediatric residents in behavioral health, 2) positive behavioral intervention and supports (PBIS) in urban schools, and 3) facilitating continuity of care between school and medical providers (multimodal treatments and medication monitoring). His work fits within an implementation science framework in order to develop approaches to high quality clinical care in traditionally underserved applied settings.

Candidate for School Psychology Faculty Position

“Behavioral Health Integration in Schools and Pediatric Primary Care: Providing Evidence-based Care to Youth where Accessible”

October 21, 2015
Room A317
12:15-1:15pm
